

Turmeric (Curcuma longa | Haldi)

KEY PHYTOCHEMICAL

Curcumin

HOW IT HELPS IN PSORIASIS

- Reduces skin inflammation and slows excessive skin cell growth.
- Lowers inflammatory signals involved in psoriasis.

USAGE & EVIDENCE

Type: Plaque / General models

Form: Topical (creams) / Oral supplements

Ahmad, Asad, et al. "Curcumin Nanogel Preparations: A Promising Alternative for Psoriasis Treatment." *Current Drug Metabolism*, vol. 25, no. 3, 2024, pp. 179–87.

Kasprzak-Drozd, Kamila, et al. "Potential of Curcumin in the Management of Skin Diseases." *International Journal of Molecular Sciences*, vol. 25, no. 7, Mar. 2024, p. 3617.

Neem (Azadirachta indica | Neem)

KEY PHYTOCHEMICAL

Nimbolide

HOW IT HELPS IN PSORIASIS

- Reduces skin inflammation and abnormal skin cell proliferation.
- Topical formulations improved psoriasis-like lesions in studies.

USAGE & EVIDENCE

Type: Plaque / Skin inflammation

Form: Topical gel / cream formulations

Patch test recommended

More, Nilesh Barku, et al. "Natural Product Topical Therapy in Mitigating Imiquimod-Induced Psoriasis-like Skin Inflammation-Underscoring the Anti-Psoriatic Potential of Nimbolide." *Indian Journal of Pharmacology*, vol. 53, no. 4, 2021, pp. 278–85.

Aloe Vera (Aloe vera | Ghritkumari)

KEY PHYTOCHEMICAL

Aloe gel polysaccharides

HOW IT HELPS IN PSORIASIS

- Soothes irritated skin and reduces redness and scaling.
- Clinical studies support topical aloe in plaque psoriasis relief.

USAGE & EVIDENCE

Type: Plaque psoriasis

Form: Topical gel directly on lesions

Farahnik, Benjamin, et al. "Topical Botanical Agents for the Treatment of Psoriasis: A Systematic Review." *American Journal of Clinical Dermatology*, vol. 18, no. 4, Aug. 2017, pp. 451–68.

Black Pepper (Piper nigrum | Kali Mirch)

KEY PHYTOCHEMICAL

Piperine

HOW IT HELPS IN PSORIASIS

- Reduces inflammatory signaling in psoriatic skin models.
- Improves psoriasis-like inflammation in laboratory studies.

USAGE & EVIDENCE

Type: Psoriasis-like skin inflammation

Form: Oral dietary component (not for topical use)

Lu, Hui, et al. "Piperine Ameliorates Psoriatic Skin Inflammation by Inhibiting the Phosphorylation of STAT3." *International Immunopharmacology*, vol. 119, June 2023, p. 110221.

Kalonji (Nigella sativa | Kalonji)

KEY PHYTOCHEMICAL

Thymoquinone

HOW IT HELPS IN PSORIASIS

- Reduces inflammatory cytokines driving psoriasis.
- Nano-formulations showed strong anti-psoriatic effects.

USAGE & EVIDENCE

Type: Plaque / Psoriasis-like models

Form: Topical nano-gel / Oral seed oil

Negi, Poonam, et al. "Thymoquinone-Loaded Lipid Vesicles: A Promising Nanomedicine for Psoriasis." *BMC Complementary and Alternative Medicine*, vol. 19, no. 1, Nov. 2019, p. 334.

Hwang, Jacqueline R., et al. "A Review of *Nigella Sativa* Plant-based Therapy in Dermatology." *International Journal of Dermatology*, vol. 60, no. 12, Dec. 2021.

Giloy (Tinospora cordifolia | Giloy)

KEY PHYTOCHEMICAL

Whole plant extract

HOW IT HELPS IN PSORIASIS

- Modulates immune activity and reduces inflammatory cytokines.
- Ayurvedic extracts showed protection in psoriasis models.

USAGE & EVIDENCE

Type: General psoriasis-like inflammation

Form: Oral herbal extract / Adjunct support

Arora, Neha, et al. "Inhibition of Imiquimod-Induced Psoriasis-like Dermatitis in Mice by Herbal Extracts from Some Indian Medicinal Plants." *Protoplasma*, vol. 253, no. 2, Mar. 2016, pp. 503-15.

Ashwagandha (*Withania somnifera*)

KEY PHYTOCHEMICAL

Seed fatty acids / withanolides

HOW IT HELPS IN PSORIASIS

- Reduces skin inflammation and repairs psoriatic lesions.
- Topical application improved skin in research studies.

USAGE & EVIDENCE

Type: Psoriasis-like skin inflammation

Form: Topical oil / Oral adaptogenic support

Balkrishna, Acharya, et al. "Super Critical Fluid Extracted Fatty Acids from *Withania Somnifera* Seeds Repair Psoriasis-Like Skin Lesions and Attenuate Pro-Inflammatory Cytokines (TNF- α and IL-6) Release." *Biomolecules*, vol. 10, no. 2, Jan. 2020, p. 185.

Gotu Kola (Centella asiatica)

KEY PHYTOCHEMICAL

Asiaticoside, Madecassoside

HOW IT HELPS IN PSORIASIS

- Promotes skin healing and reduces inflammation.
- Traditionally used for chronic skin disorders including psoriasis.

USAGE & EVIDENCE

Type: Plaque psoriasis / Wound-like lesions

Form: Topical creams / Oral herbal supplements

Bandopadhyay, Shinjini, et al. "Therapeutic Properties and Pharmacological Activities of Asiaticoside and Madecassoside: A Review." *Journal of Cellular and Molecular Medicine*, vol. 27, no. 5, Mar. 2023, pp. 593–608.

Salai Guggul (*Boswellia serrata*)

KEY PHYTOCHEMICAL

Boswellic acids

HOW IT HELPS IN PSORIASIS

- Suppresses inflammatory immune pathways driving psoriasis.
- Natural anti-inflammatory agent for autoimmune conditions.

USAGE & EVIDENCE

Type: General psoriasis inflammation

Form: Oral standardized extract

Moudgil, Kamal D., and Shivaprasad H. Venkatesha. "The Anti-Inflammatory and Immunomodulatory Activities of Natural Products to Control Autoimmune Inflammation." *International Journal of Molecular Sciences*, vol. 24, no. 1, Dec. 2022, p. 95.

Licorice (*Glycyrrhiza glabra*)

KEY PHYTOCHEMICAL

Glycyrrhizin

HOW IT HELPS IN PSORIASIS

- Reduces inflammatory adhesion molecules in skin cells.
- Improved psoriasis-like lesions in animal models.

USAGE & EVIDENCE

Type: Plaque / Psoriasis-like inflammation

Form: Topical gel / Oral extract (supervised)

Xiong, Hui, et al. "Glycyrrhizin Ameliorates Imiquimod-Induced Psoriasis-like Skin Lesions in BALB/c Mice and Inhibits TNF- α -Induced ICAM-1 Expression via NF- κ B/MAPK in HaCaT Cells." *Cellular Physiology and Biochemistry*, vol. 35, no. 4, 2015, pp. 1335–46.

Amla (Phyllanthus emblica | Amla)

KEY PHYTOCHEMICAL

Vitamin C, Polyphenols

HOW IT HELPS IN PSORIASIS

- Strong antioxidant that supports skin barrier repair.
- Supportive role in chronic inflammatory skin conditions.

USAGE & EVIDENCE

Type: Supportive skin-health role

Form: Oral supplement / Dietary fruit

Ahuja, Ashima, et al. "Miracles of Herbal Phytomedicines in Treatment of Skin Disorders: Natural Healthcare Perspective." *Infectious Disorders - Drug Targets*, vol. 21, no. 3, May 2021, pp. 328–38.

Holy Basil (Ocimum sanctum | Tulsi)

KEY PHYTOCHEMICAL

Eugenol, Ursolic acid

HOW IT HELPS IN PSORIASIS

- Natural anti-inflammatory and antimicrobial effects.
- Traditionally used to support skin health in Ayurveda.

USAGE & EVIDENCE

Type: General skin inflammation

Form: Oral tea / Topical herbal blends

Ahuja, Ashima, et al. "Miracles of Herbal Phytomedicines in Treatment of Skin Disorders: Natural Healthcare Perspective." *Infectious Disorders - Drug Targets*, vol. 21, no. 3, May 2021, pp. 328–38.
